Chicken Farm Initiative (CFI) Regional impact Statement

Incredible success in 2019 and 2020! Chicken farms to date are self-sufficient after a one-time redevelopment grant. Farmers are prepared to mentor others to grow the rebuilding of the agriculture operations so the positive impact is compounded. The profits from the chicken sales funded both subsequent rounds of chicken operations and in some cases redevelopment of other farm work such as growing crops or raising sheep—diversifying their income stream. Two new farms are starting the rebuilding process in August 2020.

THE CFI IS A WAY TO RESTORE AT LEAST PART OF WHAT ISIS DESTROYED.

- Chicken farm details:
 - Estimated jobs created or supported by the reopening of each farm: 120+
 - Job categories include:
 - day laborers at various parts of the chicken project,
 - market jobs (groceries, fodder seller/grower, restaurants, etc),
